PROFESSIONAL SUMMARY

Early-career product and business generalist who enjoys turning ambiguous problems into working solutions. Built an AI-powered roommate compatibility platform from scratch by combining user research, analytics, and machine learning. Comfortable working across product, operations, market research, and strategy in fast-paced startup environments.

VENTURE & PRODUCT EXPERIENCE

AI-Powered Roommate Compatibility Platform

2026 - PRESENT

Independent Product Initiative

github.com/ginny212/roommate-compatibility

- Created and launched an end-to-end roommate compatibility platform addressing compatibility challenges in shared housing.
- Conducted primary research through large-scale survey collection and analysis to identify lifestyle, behavioral, financial, and personality factors influencing roommate success.
- Created an NLP-based personality prediction module to convert open-ended lifestyle descriptions into structured compatibility insights.
- Optimised a hybrid recommendation engine combining structured attributes, behavioral patterns, and personality signals.
- Took the product from idea to deployment by leading user research, feature prioritization, model development, testing, and iteration.
- Improved platform scalability for potential applications in co-living, student housing, rental marketplaces, and community-building ecosystems.

PROFESSIONAL EXPERIENCE

Scale100x.ai

JUN 2026 - PRESENT

Expansion Strategist

- Leading strategic expansion initiatives and growth operations for the AI-powered scaling platform.

Inddhan | Remote

JAN 2025 - MAY 2025

Data Analytics Intern

- Analyzed demographic and behavioral datasets to identify customer segments and support targeted engagement strategies.
- Created decision-support models to evaluate alternative financial repayment approaches and improve planning outcomes.
- Generated business insights to support personalized recommendations and operational efficiency improvements.
- Collaborated on data-driven initiatives focused on customer experience and process optimization.

HRAnexi

MAY 2024 - JUL 2024

Market Research Intern

- Conducted competitive intelligence research across industries to evaluate market positioning, pricing strategies, and service offerings.
- Automated reporting workflows using advanced Excel techniques, reducing manual effort and improving data accuracy.
- Synthesized research findings into actionable insights for stakeholders and decision-makers.
- Supported strategic planning through structured market analysis and trend evaluation.

SalesEra | Remote

JAN 2024 - MAY 2024

Market Research Intern

- Automated recurring market research and lead intelligence workflows using Python.
- Structured and analyzed business data to support growth and sales initiatives.
- Identified market opportunities, customer segments, and business trends through data-driven research.

ADDITIONAL PROJECTS

Operational Data Quality Automation (Excel)

- Created automated data validation and quality check workflows using Excel to streamline reporting.
- Improved data ingestion, preprocessing, and reporting accuracy across operations.
- Optimised interactive dashboards for monitoring operational performance metrics.

EDUCATION

HSNC UNIVERSITY, MUMBAI

Bachelor of Science (Data Science)

2022 - 2025

7.7/10 CGPA
